

## Daily Treatment with Multi-Level Hydration Dynamics

*Restorative Hydration Cream revives tired and stressed skin with fast-acting active ingredients.*

Replace moisture instantly at the epidermal layer with naturally derived Hyaluronic Acid (HA) from CALECIM®'s unique proprietary source. Rejuvenating Conditioned Media, a culture of powerful proteins derived from umbilical cord lining extract, goes beyond hydration: it helps skin replenish its own HA from within, while aiding in restoring skin's epidermal cell cycle so that fresh, new skin cells can rise to the surface.

Through in-vitro tests, Cord Lining Conditioned Media has been shown to increase cell proliferation and boost production of HA in skin samples.

The result: Instantly plumping and hydrating, visible improvement of fine lines and shadows, and restoration of youthful glow and radiance.

## Dry Skin: Damage Beyond the Surface

Dehydration can be caused by aging and daily environmental exposure. Some in-clinic procedures may even aggravate dry skin. Regardless of the causes, the effects of dehydration are similar:

- inability of the skin to form healthy stratum corneum that can retain water
- inability to shed old cells
- prone to transepidermal water loss in low humidity, especially in air-conditioned environments

In addition to the negative effects of dehydration such as dry, rough skin with fine lines, chronic dehydration can also lead to further damage in the dermal layers. Scientific studies have shown that a breakdown of elastin and collagen fibres in the dermal layers can be caused by chronic dry skin. This can affect even young individuals, leading to premature aging.

## Clinically Verified Hydrating Action

Visible Results in 2 to 6 weeks

**Overall:**  
Improved radiance and skin translucency

Fuller skin resulting in lifting effect

Tightening of skin along jawline

**Overall:**  
Improved radiance and skin translucency

Fuller skin resulting in lifting effect

Tightening of skin along jawline

**Overall:**  
Improved skin tone and fullness, improved skin drape

Fuller skin resulting in cheek lifting effect

Tightening of skin along jawline

## Replenish moisture on the Surface. Sustain hydration beneath

**Restorative Hydration Cream provides immediate hydrating relief for:**

- Thin, dry skin with fine lines, or skin with a thickened, rough epidermis
- Skin with signs of premature aging
- Sensitive skin due to dryness
- Post-procedure skin which needs deep and sustained hydration to promote natural repair
- Skin that requires maintenance after Hyaluronic-acid based treatments

**Product Pairing to Effectively Target Significant Signs of Aging**

The combination of Multi-Action Cream and Restorative Hydration Cream is the best strategy to treat aging skin

### MULTI-ACTION CREAM

- Enhances skin density
- Visibly works to define and correct facial definition
- Smooths appearance of deep wrinkles, tightens jawline, corrects nasolabial folds, and lifts eyelids and brows

### RESTORATIVE HYDRATION CREAM

- Replenishes epidermal hydration
- Boosts skin's own production of moisture
- Retains optimal hydration necessary for skin's natural renewal and rejuvenation
